

COVID-19 Corona Virus: No critical problems for the supply chain of Breitenfeld Edelstahl AG

With reference to the current regulation of the Federal Government regarding containment of the corona virus, the following statement or measures are done by Breitenfeld Edelstahl AG:

We assure our customers that the production and supply chain of Breitenfeld Edelstahl AG fully meets the government's requirements. We adapt to the new situation and try to maintain the uninterrupted service for our customers in compliance with the legal requirements. We have immediately implemented all applicable and possible activities to ensure the integrity and continuity of the business. In addition, we have implemented strict health measures that have been communicated to all employees.

Measures for external visitors allow external access only for deliveries that are connected with the continuity of the manufacturing activities.

There are currently no restrictions affecting the production or delivery of goods. Goods can be loaded as far as the logistics companies comply with the following instructions:

- a) The drivers must be equipped with masks for mouth and nose.
- b) If the driver has to get off the truck for loading and unloading, he must also keep a safety distance of one meter between people.
- c) Avoid touching, such as shaking hands when greeting / saying goodbye.
- d) Transmission by email if possible with delivery documents

Further updates will follow in accordance with legal requirements.

Until now we see no evidence of the risk of disruption to production, customer service, delivery, or the supply chain. Nevertheless, strong efforts are put into preventive emergency planning, in the event of stricter requirements from the government we will respond immediately and inform our partners.

If the situation changes in such a way that deliveries are affected, you will be informed preventively and timely. You will be informed of a plan for damage limitation or recovery.

We act according to the motto: "Health first!"
